Applied Data Science (MAST30034)
Team Review and Self Reflection Specification

Due date: Friday 27th of October 2359 (End of SWOTVAC)
Assessment Weight: 10% + scaling of Project 2 marks

Overview

The Team Review and Self Reflection will consist of:

- A table of Team Member vs Effort provided in the template.
- A couple hundred words per dot point listed below.

Details

In a single page (not including the table), please answer the following questions:

- What you gained and learned from Project 2;
- How you communicated and ensured everyone in the team worked together;
- and any issues that came up in the team discussions and how they were resolved.

For the Effort, the percentages will be completely anonymous within your group and will only be used if there is a disagreement with the amount of work certain students put in. If you believe you put in more work, then you should adjust the percentages accordingly. If you believe you put in minimal work, you should increase the percentages for your other group members and decrease yours.

Make sure to add your student name, group number, and student ID in the template document.

If the percentages are greatly disproportionate, the Head Tutors will investigate the `git` commits, meeting minutes, and tutor notes from the weekly attendance & checkpoints marking spreadsheet. Scaling will be conducted after the raw results have been released, so the final raw marks may not be indicative of a students' final scaled marks.
